INFORMATION TECHNOLOGY (SUBJECT CODE - 802) Class XI (Session 2024-2025)

Total Marks: 100 (Theory-60 + Practical-40)

	UNITS	NO. OF for The Prac	HOURS ory and tical	MAX. MARKS for Theory andPractical	
	Employability Skills				
	Unit 1 : Communication Skills-III	10		2	
◄	Unit 2 : Self-Management Skills-III	1	0	3	
L,	Unit 3 : ICT Skills-III	10		1	
Ра	Unit 4 : Entrepreneurial Skills-III	15		3	
	Unit 5 : Green Skills-III	0	5	1	
	Total	5	0	10	
	Subject Specific Skills	Theory (In Hours)	Practical (In Hours)	Marks	
	Unit -1 : Computer Organization	15	15	5	
ш	Unit -2 : Networking And Internet	15	25	10	
IT	Unit-3 : Office Automation Tools	15	30	10	
D a	Unit-4: RDBMS	15	20	10	
	Unit-5: Fundamentals of Java	25	35	15	
	Total	85	125	50	
	Practical Work				
U	Office Automation Tools			15	
art	JAVA Programme			10	
Ľ	MYSQL Commands			5	
	Total			30	
0				1	
ヒ	Practical File			05	
Jai	Viva Voce			05	
	Total			10	
	GRAND TOTAL	20	50	100	

DETAILED CURRICULUM/TOPICS FOR CLASS XI:

Part-A: EMPLOYABILITY SKILLS

S. No.	Units	Duration in Hours
1.	Unit 1: Communication Skills-III	10
2.	Unit 2: Self-management Skills-III	10
3.	Unit 3: Information and Communication Technology Skills-III	10
4.	Unit 4: Entrepreneurial Skills-III	15
5.	Unit 5: Green Skills-III	05
	TOTAL DURATION	50

NOTE: Detailed Curriculum/ Topics to be covered under Part A: Employability Skills can be downloaded from CBSE website.

Part-B – SUBJECT SPECIFIC SKILLS

- Unit -1: Computer Organization
- Unit -2: Networking and Internet
- Unit-3: Office Automation Tools
- Unit-4: RDBMS
- Unit-5: Fundamentals of Java

UNIT-1 COMPUTER ORGANIZATION

S. NO.	LEARNING OUTCOMES	THEORY	PRACTICAL
1	Understand and appreciate fundamentals of Computer and itscharacteristics	 Introduction to Fundamentals of Computer and its use Characteristics of computer Components of computer Block diagram of computer Processes of task execution steps of process execution function of various components of computer and CPU 	 identify and enlist various applications of computer illustrate various components of computer under different blocks illustrate functions of various components of computer
2	Understand the components of computer	 identify various components of computer appreciate function and use of I/O devices learn about various storage devices used in computer various memory units ofstorage 	 illustrate various types of I/O devices identify and find out the application of each of the I/O Devices

S.	LEARNING	THEODY	DDACTICAL
NO.	OUTCOMES	INCURT	FRACIICAL
3	Understand Operating System	 introduction to Operating System and its need functions of operating system types of operating system difference between various operating systems 	 identify different types of OS in computers/mobile phones identify the different in features of various operating systems
4	Troubleshooting in computer system	 introduction to common troubleshooting/ problems common troubleshooting steps troubleshooting hardware problems like display, keyboard, mouse etc. troubleshooting printer problems understanding printer IP address understanding various printer settings like fast/ slow printing sound troubleshooting understanding speaker settingslike volume etc. troubleshooting software problems troubleshooting networking problems learn about problems in network fly lead, network card 	 identifying different kinds of problems in the system and its peripheral devices setting up a printer selecting a printer setting default printer changing printer settings how to forcefully restart a computer or stop a task demonstration of problems in fly lead, network card and possiblesolutions
5.	Understand the importance of Utilities	 Disk Space management Disk Cleanup Managing Recycle Bin learning about disk defragmentation learn to remove unused programs learn to disable unused program services restart the system learn to use command prompt to search for a file. 	 illustration to view the disk storage to apply Disk Cleanup utilities to enhance performance of the system to identify, view and manage Recycle Bin illustration and hands onto remove unused programs illustration and hands on to disable/enable program services restart the computer to search different files using various options and wildcard characters

UNIT 2: NETWORKING AND INTERNET

S.	LEARNING	THEORY	PRACTICAL
1.	Understand Computer Networking	 Introduction Need and benefits of networking Components of a network: sender, receive, message, channel, Transmission Medium (wired and wireless) Telephone Network standard (technology used in each generation) Working Devices (RJ45 connector, Modem, Repeater, Hub, Switch, Bridge, Gateway, Routers) Network Topology (Bus, Star , Ring, Tree, Mesh) Types of Networking (LAN, MAN, WAN, PAN, VAN) 	 Illustrate various networks and its benefits Identify the transmission medium, devices, network topology, type of networking in computer lab Setting up hotspot
2.	To understand Internet and its terminology	 Introduction and use of Internet Digital Literacy Terminology (Channels, Bandwidth (HERTZ, KHZ), ISP) Internet Devices: Repeater, Hub, Switch, Gateway, Bridge, Router Data Transfer Rate (bps, Kbps, KBps, Mbps, MBPS, Gbps, GBPS) Protocols (TCP/IP, FTP, HTTP, SMTP, POP3, PPP, UDP) 	 Analyze the Bandwidth, identify Internet devices and their significance to check/view Data transfer rate in computer lab/devices
3.	Understand cybercrime and the need of Cyber Security	 Network safety concerns: (Digital Footprints, Threats, Virus, Worm, Trojan Horse, Spam, Malware, DoS Attacks, Eavesdropping, Adware, Spyware, Snooping) Networking Security Measures (Antivirus, Firewall, Login ids and Password) Cyber Crime (Phishing, Pharming, Spoofing, Cyber Bullying, Hacking, Cracking, Identity Theft, Cyber Stalking, Cyber Trolling, Cyber Safety (Netiquettes, IT Act, Cyber Laws) 	 Find out the threats encountered and the security measures used in computer lab and mobile phones go through the link <u>https://www.cyberla</u> <u>wsindia.net</u>

UNIT 3: OFFICE AUTOMATION TOOLS

S. NO.	LEARNING OUTCOMES	THEORY	PRACTICAL
1.	Word processor	 Introduction work with Word processingapplications like OpenOffice, Introduction to Word Processing windowcomponents like work area, ruler, tab etc. Understanding various tabs like File, Edit, Insert, View and their submenu options to format a document using OpenOffice Writer. Learn to create tables in word processors 	 List the available wordprocessing applications. Introduce the parts of the main window. Change document views. Start a new document. Open an existing document. Save a document. Close a document. Use the Navigator.
2.	Spreadsheets	 appreciate need and use of spreadsheets learn to install an open source spreadsheet software like Calc learn components of the Spreadsheet title window. appreciate different formatting features available in spreadsheets learn to work, save and close spreadsheets work with data, move data, use edit menu Use AutoFill, formatting data, alignment, changing cell color, gridlinesand borders, flow of text, merging, splitting text, wraptext, shrink to fit Numeric data formatting Find and Replace Data delete data and formatting delete cells insert delete rows and columns using formula and functions various type of operators predefined functions in spreadsheets (sum(), sqrt(), product(), power(), log(), round(), abs(), average() etc. addressing/ referencing: absolute, relative, mixed sort and filter data create chart and graph, setting legend, grids in charts, resizing and moving charts, modifying and deleting charts create/record a macro, run/use macros print spreadsheets 	 demonstration of components of the Spreadsheet window. demonstration and hands on to insert formulae and use inbuilt functions efficiently make charts using chart tools in spreadsheet sort data according tovarious criteria change colour, alignment, set borders insert, delete, hide, show rows and columns creating macros and use them efficiently merging two or more cells, splitting a cell search data using Findoptions, search and replace a selected piece of text

S. NO.	LEARNING OUTCOMES	THEORY	PRACTICAL
S. NO.	LEARNING OUTCOMES	THEORY	PRACTICAL
3.	PowerPoint	 introduction to presentation software start OpenOffice Impress overview of OpenOffice study of various tabs of OpenOffice understand various views of presentation, animations, transitions, header, footer etc. 	Students will be able to work with presentation software

UNIT 4: RDBMS

S. NO.	LEARNING OUTCOMES	THEORY	PRACTICAL
1.	Understand Relational Database Management System	 Database and its purpose Components of a table Relational Database Model Terminology (Relation, Tuple, Attribute, Cardinality) Keys (Primary, Candidate, Alternate, Foreign) 	 Installation of MYSQL Simple calculations in MYSQL
2.	Introductionto MYSQL	 Introduction To MYSQL Classification of MYSQL commands (DDL, DML) Data Types in MYSQL (char, varchar, decimal, int, date, time) Create database Create table View structure of a table Add constraints in table Modify structure Show all tables created in a database Delete structure 	 CREATE DATABASE USE CREATE TABLE DESCRIBE SHOW TABLES ALTER TABLE DROP TABLE
3.	DML Commands	 Add rows to a table Viewing content of a table Display selected data depending on specific condition Display data in a order modify the data stored in a table delete contents of a table 	 INSERT INTO UPDATE DELETE Using WHERE, ORDER BY, DISTINCT, LIKE, BETWEEN, IN

UNIT 5: FUNDAMENTALS TO JAVA PROGRAMMING

S. NO.	LEARNING OUTCOMES	THEORY	PRACTICAL
1	Understand Integrated Development Environment (NETBEANS)	 Components of IDE Understand and change Properties and methods ofComponents like jButton, jLabel, jTextField, jTextarea, jRadiobutton, jCheckbox, jPasswordField, jListBox, jComboBox 	 Create a project Create a JFrameForm container Add a button component on JFrameForm and change properties like text, font, foreground etc using properties window Add other container controls like jTextField , jTextarea, jRadiobutton, jCheckbox, jPasswordFieldjListBox, jComboBox and change their properties
2	JAVA Programming	 Introduction to Object Oriented Programming To understand various data types (primitive) and purpose of each data type To understand the need and usage of variables To understand usage ofoperators (assignment, arithmetic, relational, logical, bitwise) To understand how to attach a code with components like jButton,jLabel, jTextField and create a simple application on JFrame To understand the use ofvarious components like jTextarea, jRadiobutton, jCheckbox, jPasswordField, jListBox,jComboBox, JTable, JOptionPane, JPanel To understand when to use selection statements (if, if else and switch case) 	 Display message Using jlabel and jtextField Join two text entries and display them Write code to close the application Using Joption Pane display a message "welcome to INFORMATION TECHNOLOGY" Perform simple arithmetic calculationusing operators and display the result Write the code to find simple interest Write code to perform an operation based on the criteria input by the user in a checkbox or radio button change the background colour of jbutton based on the colour selected from the jListBox /jComboBox accept marks in 5 subjects and find out the total, percentage. Also displaygrade depending on the total marks obtained. Enter a character and find out it is vowel or consonant
